

# HEAT PUMP BENEFITS

Hassle free heating

Low maintenance

Receive a grant payment of up to  
£6,000 for your domestic project

Infinite range of applications -  
no building too big or small for  
a heat pump

A Panasonic air source heat pump can  
generate 3.5kW of heat for every 1kW  
of electricity used

No combustion -  
clean, green energy

## ZERO VAT

Pay zero VAT on heat  
pumps until 2027

A Lämpöässä heat pump can  
generate 4kW of heat for every 1kW  
of electricity used

Switch your  
electricity  
supplier each  
year to save  
even more

Air source heat pumps can work  
in outside temperatures of -15°C

A ground source heat  
pump lasts 30 years+ -  
three times as long as a  
conventional boiler

## FIVE

System pays back  
in five years

## 2X

An air source  
heat pump lasts  
15 years - twice  
as long as a  
conventional boiler

## 70%

70% of energy  
produced from a  
ground source heat  
pump comes from  
underground
